

Cen Oil

POWERFUL NATURAL OMEGA 3 BOOST – 100% NATURAL PLANT BASED OIL WITH ANTIOXIDANTS

- Healthy shine & coat quality
- Non-heating 'cool' energy source, highly digestible & palatable
- High quality plant based source of Omega 3
- Immune system health & may help reduce inflammation
- Assists in weight gain/maintaining condition

From pleasure to performance horses, CEN Oil is used successfully by horse owners all around Australia.

Recommended Dosage per day (Mix with feed):

30-60mL Maintenance, 60-90mL Light Work, 90-120mL Medium Work, 120-250mL Heavy Work

CEN Oil is produced to a high quality standard, which ensures the rate of oxidation is much slower.

Room temperature storage is sufficient for up to 3 months on opening. It is essential to store CEN Oil below 30°C. If storing in feed sheds, remove to a cooler place on temperature days above 30°C. All feed products should be kept below 30°C to maintain freshness and quality.

DESCRIPTION

There are many oils available on the market with an unnatural Omega profile to that of fresh pasture, having higher levels of Omega 6 to Omega 3.

Most oils on the market including:

Rice Bran Oil (RBO)

Corn

Canola

Olive

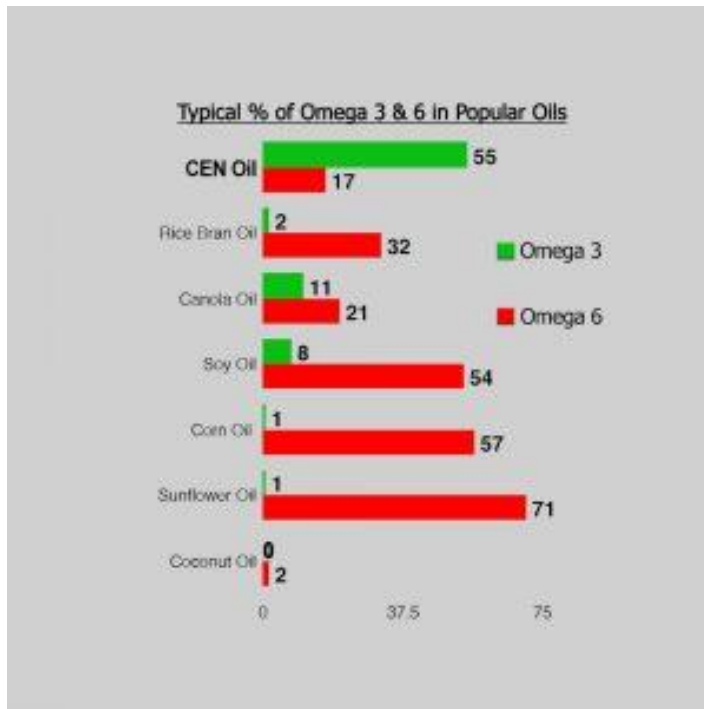

Soybean

Cottonseed

Sunflower Oil

All have higher Omega 6 to Omega 3 levels which is opposite to what is found in natural fresh pasture. (1)(2)

Coconut Oil contains no Omega 3.

CEN Oil contains over 50% Omega 3, a similar Omega profile to fresh pasture.

Omega 3 cannot be made by the horse, they require it in their diet from fresh pasture or by adding to feed.

Omega 3 is essential for overall health particularly beneficial for brain, nerve and muscle function, the immune system, coat/skin, joints and hooves.

Dr. Juliet Getty – highly regarded and internationally respected, independent equine nutritionist writes –

“Omega 3s block the formation of inflammatory molecules that are readily formed from Omega 6s.

Take a close look at the fat sources you are feeding to confirm that enough Omega 3s are in the diet.”

Containing over 50% Omega 3, CEN Oil provides a high quality source of plant based Omega 3 with a similar Omega profile to fresh pasture. All natural, no chemicals and formulated from high quality linseed/flaxseed oil.
