

CEN Gold – Joint Support

CEN Gold is a unique natural formulation which may help reduce inflammation and assist in immune system health.

Supports healthy joint function
May assist in skin/coat health
Supports digestive health
High in polyphenols & antioxidants

Available in:
1.5kg – 37 Day Supply

5kg – 125 Day Supply

DESCRIPTION

CEN Gold is a unique natural formulation which may help reduce inflammation and assist in immune system health.

Formulated from organic turmeric (5% curcumin), rosehip granules and stabilised linseed meal (25% Omega 3). Rich in antioxidants and polyphenols, CEN Gold has been trialled successfully with horse owners and trainers around Australia.

A natural daily support to help limit the need for prolonged use of anti-inflammatory medication for chronic conditions.

An example of the feedback from clients "My gelding went from barely being able to do canter/trot transitions to doing our first flying change with no difficulty at all!" E.Ponsi

About Stabilised Linseed Meal:

Food grade full-fat milled linseeds (Non-GMO) are used. Antioxidants help preserve the purity and integrity of the oil while making the proteins highly useable for equine use. None of the natural oils are removed or expelled during the process leaving all of the nutritious and desirable Omega 3 fatty acids intact. Lab tested 25% Omega 3 at room temperature. There are no added/artificial preservatives.

How does Turmeric act as an anti-inflammatory?

It contains Curcumin which is a biologically active phytochemical that inhibits the COX-2, while maintaining COX-1 enzymatic function. Therefore reducing inflammation and pain without the side effects.

An example of its effectiveness is in horses suffering from osteoarthritis.

Researchers from DE Germany and The UK GB revealed that curcumin significantly reduces the inflammatory pathways found in horses suffering from osteoarthritis.

▲The underlying cause of pain is due to a release of cytokines and reactive oxygen species (inflammatory substances) that can lead to further degradation of joint tissue. By Inhibiting COX-2 while preserving COX-1 enzyme the inflammation and pain is controlled and stomach lining is protected.

Overall, long term (chronic) inflammation in horses is not desirable. It is now well recognized to be a primary component of virtually all chronic degenerative diseases, such as arthritis and heart disease, and also plays a part in many other conditions including allergies and insulin resistance.

Ingredients:

A proprietary blend of: Organic Turmeric, Rosehip & Stabilised Linseed Meal

Serving Suggestions:

Serving Size: 40 grams/day. One (1) level scoop

Feed daily mixed well with feed. 40g/day (1 full scoop) for a 500kg horse.

Can be split into 20g morning and night.

Does not contain restricted animal material. No chemicals or fillers.
