Vineyard Program

YLAD Humus Compost Prescription Blend

Once a year, undertake soil testing to determine soil nutrient requirements. Apply YLAD Humus Compost Prescription Blend at a rate of 2000kg to 4000kg depending on soil requirements. The YLAD Humus Compost Prescription Blend is specifically designed and applied pre budburst to balance the minerals in your soil while building a diverse population of soil biology. YLAD Humus Compost also assists with improving soil structure and water holding capacity.
