

YLAD Living Soils 14th Annual Field Day

Ever increasing fertiliser rates and chemical use are just a few problems caused by poor soil structure created by modern chemical agriculture. However there are solutions, by combining Biological Farming Techniques with your current system you can unlock the potential of your soil to build a healthier bottom line.

YOUNG NSW

Advancing the Power of Microbiology and Technology for Success

PRESENTERS:

DR ASH MARTIN (Microbiology Laboratories), **JAMES RENNIE** (Australian UAV - Drone Technology), **SIMON ABBOTT** (Pastures from Space Plus®), **BILL DALY AND RHONDA DALY** (YLAD Living Soils)

TOPICS TO BE COVERED:

SOIL

Finding the Missing Piece to your Soil's Productivity
Learn new ways to interpret soil tests // Build soil structure and balance essential minerals to improve microbes in your soil // *The answer is right under your feet*

MICROBES

The Unseen Unpaid Workforce
Learn **functional groups** and their role in creating healthy soils and compost // **Identify and measure soil microbes using Molecular Markers** // **How do we manage them?**
Summing up – The relationship between soil microbiology, nutrients and structure.

HUMUS COMPOST

Why Humus Compost achieves Results in the Soil
Learn what makes **Humus Compost special** // **101 on how you can make your own** // **Identifying the difference between Industry Compost and Humus Compost** using advanced molecular methods to uncover the **microbial life** and **humus content** of compost

TECHNOLOGY

Planning and Monitoring
Satellite – Pastures from Space® Plus – Satellite technology used to accurately make decisions on grazing, feed budgeting and fertiliser application
Drones in Agriculture – A Game Changer for Agriculture // Learn how you can get the best value out of this new technology to save time and money

EVENT INFO

Date: Thursday 15 September 2016
Time: 8.30am – 5.30pm
Registrations start at **8am**

LOCATION INFO

8.30 am – 12.30 pm
Young S & C Club
Cloete Street YOUNG

1 pm – 5.30 pm – Paddock
Demonstrations & Visit
'Milgadara'
Moppity Road YOUNG

Practical Demonstrations in the Field:

- Aeromaster Compost Turner – Humus Compost Production
- Brookfield SeedDrill
- Compost Tea Extraction – Humus Extraction Process
- Drone Flight
- Liquid Injection Set up

Assess and Monitor in the Field:

- Explore and dig in soils identifying what makes a soil healthy and productive
- Pasture health growth and diversity – turning pasture into profit to maximise weight gain
- Wheat and Lupin growth and yield potential

Your participation at this Field Day can help accelerate the progress towards a better world. The new paradigm is something we will create and implement together.

TESTIMONIALS

“ Seeing the evidence of what happens to crops, pastures and animals when you focus on the health of the soil ”

ATTENDEE 2015

“ Support from YLAD Living Soils. Proven research, inspiration and knowledge ”

CHRIS ROACH

“ Knowing that there are other people with a similar mindset about soil health and farming ”

ATTENDEE 2015

“ Have a paddock visit with John to discuss his approach and the benefits and outcomes. ”

ALISON CLARK

“ Why didn't you have these workshops 50 years ago? ”

ATTENDEE 2015

SOILS ARE YOUR GREATEST ASSET

This workshop is your first step toward the quantum leap that will change the way you farm

FOREVER!

REGISTRATIONS

Booking are essential

FEE: \$60 inc. GST – if you are able to register early it would be appreciated we don't want you to miss out
EARLY BIRD: \$50 inc. GST – Must be paid by September 1 2016

INCLUDES: Powerpoint presentation notes, bus, lunch, morning and afternoon tea
