

SOIL THERAPY™ STONEFRUIT PROGRAM

3 Easy Steps to Boost Production & Profit

Step 1

Soil Therapy™ Report and LifeForce® Prescription Blend

Once a year, undertake soil testing using the **NTS Soil Therapy™ Service** to determine soil nutrient requirements. Broadcast your specifically designed **LifeForce® Prescription Blend** immediately after harvest. Balancing the minerals in your soil will help to improve soil structure and increase general fertility. Contact NTS or your distributor for details.

Step 2

Fertigation and Foliar Program

Please note that this is a general program and should be monitored and fine-tuned with leaf analyses. Certain fertigation inputs may need to be omitted based on soil excesses (contact your Soil Therapy™ Agronomist).

Foliar*

Apply just prior to flowering:

Cal-Tech™ at 4 L/ha

Dia-Life™ at 5 L/ha

Nutri-Neem™ at 2 L/ha

Tonic-Tech™ at 1:500

Apply during stone-hardening (1 or 2 applications)

Phos-Life™ at 5 L/ha

K-Carb 35™ at 5 L/ha

Nutri-Key Shuttle Seven™ at 2 L/ha

Apply during fruit-fill (at least 2 applications)

Calcium Shuttle™ at 5 L/ha

Apply post harvest (leaf drop)

Stone-Tech Triple Ten™ at 5 L/ha

Magnesium sulfate at 6 kg/ha

Nutri-Key Shuttle Seven™ at 2 L/ha

Fertigation

Apply just prior to flowering:

Nutri-Kelp™ at 1 kg/ha

Nutri-Life Trichoshield™ at 1 kg/ha

Huma-Tech Liquid Humus™ at 10 L/ha

Apply during stone-hardening (1 or 2 applications)

Phos-Life™ at 15 L/ha

Potassium sulfate at 15 kg/ha

Huma-Tech Liquid Fulvic Acid™ at 3 L/ha

Apply during fruit-fill (at least 2 applications)

Potassium sulfate at 15 kg/ha

Sea-Change KFF™ at 10 L/ha

Apply post harvest (leaf drop)

Urea at 20 kg/ha

Huma-Tech Liquid Humus™ at 10 L/ha

* Include **Cloak™** spray oil at 200 mL/100 L and **Huma-Tech Liquid Fulvic Acid™** at 2 L/ha with all foliar sprays.

Step 3

Building Biology

Nutri-Life 4/20™ is a potent microbial inoculant which will help to improve soil structure and nutrient recycling by repopulating the soil with beneficial soil biology. 4/20™ can be freshly brewed at our Yandina warehouse, stabilised with our unique **Nutri-Life Entrap™**, and delivered on farm for ease of application. Applications of this product at 100 L/ha should be alternated monthly with **Nutri-Life Myco-Tea™** (also supplied brewed on request). Myco-Tea™ is a fungal dominated inoculant which helps build soil fungi and creates an environment in which stonefruit thrive. Note: Microbial fertigations can be included with the fertilisers above - add the brewed microbes to the tank last after dilution.

Disclaimer: Any recommendations provided by Soil Therapy™ P/L are advice only. As no control can be exercised over storage, handling, mixing application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. The buyer assumes all responsibility for the use of any of our products.
