

YLAD Living Soils *Putting life back into the land*

Organic Citrus Program

3 Easy Steps to Boost Production & Profit

STEP 1 - Soil Therapy™ Report and YLAD Compost Mineral Blend

Once a year, undertake soil testing to determine soil nutrient requirements (contact YLAD Living Soils office for a free soil testing kit). Broadcast your prescription YLAD Compost Mineral Blend immediately after harvest. Balancing the minerals in your soil with Humus Compost will help to improve soil structure and water holding capacity as well as increase overall fertility and production

STEP 2 – Fertigation and Foliar Program

Please note that this is a general program and should be monitored and fine-tuned with leaf analysis. Certain inputs may need to be omitted depending on soil excesses.

Foliar

Apply just prior to flowering:

Nutri-Kelp™ - 600 gm/Ha
Inkabor (soluble boron) - 1 Kg/Ha
Cloak spray oil - 1 L/Ha
Organic Colloidal Concentrate (OCC-R) at 1:10000

Fertigation

Once per Annum

– Between September & January -

Nutri-Life Platform - 200gms per Ha with
 10 litres liquid fish
OCC-R at 1:10000

At the beginning and end of each season

Twin N – Organic Nitrogen Fixing Bacteria

Apply monthly through the season:

Molasses - 5 L/Ha
Organic Potassium Sulphate
 (naturally mined) - 20 Kg/Ha
Fast Fulvic - 3 L/Ha
OCC- R at 1:10000

Apply monthly from fruit-set to harvest:

Amino-Tech™ - 5 L/Ha
K-Carb-35 - 4 L/Ha
Magnesium Sulphate - 6 Kg/Ha
 Sulphate based trace
 (according to leaf test)
Cloak spray oil - 1 L/Ha
OCC-R at 1:10000

STEP 3 – Building Biology – YLAD Humus Extract Tea HP – Compost Tea

Building Biology – YLAD Humus Extracted Tea HP is a potent microbial inoculum produced using the Aeromaster Compost Tea Extraction Unit. It will help to improve soil structure and nutrient cycling by repopulating the soil with beneficial soil biology and humus substances. This tea applied monthly at 50-100 l/ha helps build beneficial soil biology, reduces disease causing pathogens and creates an environment in which citrus thrive. (Note: Compost Tea fertigation can be included with the fertilisers above).
